

Vendor Seminar

4 November | 13:30 – 14:15

Transforming Innovation into Operational Excellence: Advancing Technologies for Routine Success

Join our session, where we will serve up two wholesome presentations, complemented by engaging questions, answers, and discussions with peers and experts.

Presentation 1:

Speakers: Thomas Behnke & Jörg Konetzki, Mériex NutriSciences, Germany

Under Pressure: Cereulide and PFAS at ultra-trace levels in complex food matrices

Abstract: Responding to demand for cereulide and PFAS analytical services, this presentation shares practical experiences, troubleshooting, optimization strategies and valuable tips and tricks for successfully operating high-throughput methodologies under daily commercial laboratory pressure.

Presentation 2:

Speaker: Euan Ross, Waters Corporation

Expanding selectivity with mixed-mode approaches: Liquid chromatography strategies for analytes that challenge traditional C₁₈ retention

Abstract: Learn how mixed-mode liquid chromatography can improve the retention and separation of challenging polar anionic analytes, including anionic pesticides and ultrashort-chain PFAS, that are poorly retained by traditional C₁₈ methods.
